PROFILE

Informatics graduate with a focus on **Full-Stack Development**, **DBMS**, and **Data Analytics**. Experienced in developing real-time systems, dashboards, and XR (AR/VR/MR) training applications while supporting **Industry 4.0 digitalization initiatives and certification processes by the Ministry of Industry (Kemenperin)**. Currently a Digitalization & Automation Intern at PT Astra Komponen Indonesia (Astra Otoparts Group), using **Python (Django)**, **SQL Server**, and **PostgreSQL** to build data-driven applications, with familiarity in **Docker** and **CI/CD pipelines**.

WORK EXPERIENCE

PT Astra Komponen Indonesia (Astra Otoparts Group) – Bogor, West Java Dec 2025 – Present

Intern - Digitalization & Automation

- Developed and enhanced **10+ features** in a real-time production system for **100+ machines** with **1,000+ daily data transactions**.
- Built industrial modules including **Andon**, **OEE**, **rejection tracking**, **achievement dashboard**, **part list**, **PO**, **order sheet**, **DN Truck**, and **reporting systems**.
- Designed **real-time dashboards**, **data visualization**, and **analytical reports** to support production monitoring and decision-making.
- Managed **SQL Server & PostgreSQL databases (100+ tables)** handling **10,000+ records/day** with high data integrity.
- Developed backend features using **Django (Python)** and implemented **CI/CD pipelines via Git-based deployment** for system updates and reliability.

PT Astra Visteon Indonesia (Astra Otoparts Group) – Bogor, West Java Sep – Dec 2024, Jun – Nov 2025

Intern – Gamification & Digitalization

- Assisted in developing **AR/VR and Mixed Reality training applications** using **50+ interactive 3D models** for technical training and production simulations.
- Participated in **database migration activities** from **MySQL to SQL Server**, including data validation and schema adjustments.
- Supported the design of **INDI 4.0 digitalization concepts and web platforms** to improve accessibility and production data integration.
- Helped deliver **VR-based training sessions to 20+ production operators** and assisted with production and warehouse layout mapping using **Microsoft Visio**.

PROJECTS

Production Monitoring Dashboard – PT Astra Komponen Indonesia Dec 2025 – Present

Website | Django

- Developed a **web-based production monitoring dashboard** using Django to visualize the performance of **10+ production machines** in a centralized system.
- Integrated **real-time machine data updated every second** from SQL Server and PostgreSQL databases, processing **10,000+ production records per day**.
- Designed and managed **100+ relational database tables** to store and organize large-scale production data efficiently.
- Implemented **interactive data visualizations (line charts, bar charts, and summary metrics)** to support real-time monitoring and production performance analysis.

Delivery Note System – PT Astra Komponen Indonesia January 2026

Website | Django

- Developed a **web-based Delivery Note (DN) management system** to handle **100+ truck delivery records per day** in the production distribution process.
- Integrated **real-time production data from SQL Server and PostgreSQL** to display machine performance indicators within the system.
- Designed and maintained a **relational database structure with 15+ tables** to support operational data management.
- Implemented **automated reporting and printing features**, improving administrative efficiency by approximately **70% compared to manual processes**.

Website | Laravel

- Developed a **web-based event attendance system** using Laravel and Bootstrap 5 to streamline check-in processes for **500+ employees and external guests** across corporate events.
- Implemented a **real-time QR code scanning system** using HTML5-QRCode and AJAX, enabling check-in processing in under **2 seconds per attendee** and handling peak loads of **100+ attendees per minute**.
- Built a centralized admin dashboard with an **Excel bulk import feature** supporting **1,000+ employee records**, along with automated generation of **QR-based ID cards**.
- Integrated **automated PDF reporting using DomPDF**, allowing event-based filtering and export of attendance summaries, reducing manual reporting effort by approximately **80%**.

Production Trainer – PT Astra Visteon Indonesia

July – September 2025

Mixed & Virtual Reality Developer

- Developed **Mixed Reality (HoloLens) and Virtual Reality (Meta Quest 3s) applications** using **Unity** to support onboarding programs for **10+ new production employees**.
- Created and integrated **6 interactive 3D objects** from **Blender** into training applications to support real-time introduction of production tools.
- Designed **object interaction features** (rotation, zoom, and manipulation) that improved **production tool understanding by up to 70%** compared to conventional training methods.

EDUCATION

Gunadarma University

Sep 2021 – Sep 2025

Bachelor of Informatics | GPA: 3.82/4.00

TRAINING & CERTIFICATIONS

- | | |
|---|-----------------|
| • Data Science Training Certificate (Second Case) – Universitas Gunadarma | May – June 2025 |
| • Intermediate Database Training (Oracle & SQL Server) – Universitas Gunadarma | Feb - Aug 2024 |
| • Independent Study: Game Design & Development – Infinite Learning | Feb – July 2024 |

TECHNICAL & SOFT SKILLS

- **Programming Languages:** Python | PHP | JavaScript | SQL | C#
- **Frontend Development:** React.js | Next.js | Bootstrap | TailwindCSS | HTML | CSS | AJAX
- **Backend Development:** Django | Laravel | FastAPI | REST API | MVC Architecture
- **Database & Data Engineering:** PostgreSQL | SQL Server | MySQL | ETL Process | Data Pipeline | Query Optimization
- **AI & Data Science:** Pandas | NumPy | Scikit-learn | TensorFlow | Matplotlib
- **Game & XR Development:** Unity | Game Programming | Gamification | Vuforia | OpenXR | MRTK | HoloLens | Meta Quest
- **Tools & Software:** Git | Docker | Postman | Grafana | Figma | Jira | Power BI | Microsoft Visio | Visual Studio Code
- **Soft Skills:** Professional Communication | Time Management | Team Collaboration | Analytical & Problem-Solving Skills | Adaptability & Learning Agility | Leadership | Creativity & Innovation
